

SECTION VIII-3

| <u>Subject</u> | <u>Interpretation</u> | <u>File No.</u> |
|---|-----------------------|-----------------|
| KD-922(c), Stress Intensity for Inner Cylinder (2010 Edition With 2011 Addenda)..... | VIII-3-13-01 | 13-1449 |

Interpretation: VIII-3-13-01

Subject: KD-922(c), Stress Intensity for Inner Cylinder (2010 Edition With 2011 Addenda)

Date Issued: November 8, 2013

File: 13-1449

Question: Does KD-922(c) require that the calculated primary-plus-secondary stress intensity for the inner cylinder(s) be equal to or less than S_y during fabrication procedures (e.g., shrink fitting or autofrettage)?

Reply: No.
