## Insert A:
Butt joints welded from both sides, or from one side only without a permanent backing strip, that are verified as having achieved full penetration and fusion as required by UW-35.

## Insert B:
Butt joints welded from one side only with a permanent backing strip that achieves full penetration and fusion as required by UW-35.

## Insert C:
Butt joints welded from one side only without a permanent backing strip that cannot be verified as having achieved full penetration and fusion as required by UW-35.

## Insert D:
That meet the requirements of UW-36.

## Insert E:
For circumferential butt joints with one plate offset, the nominal thickness shall not exceed 5/8 in. (16 mm). See UW-9(h) and Fig. UW-9-3.

### Notes to publisher:
1. Please insert the additional horizontal and vertical grid lines within the table as shown. (Current table does not have them)
2. Limitations for Type 2 welds in the Table are proposed to be revised under action 19-1307. These revisions supersede those proposed revisions.
