B107 Interpretations

Interpretation #: B107-11-1190

Date Issued: November 18, 2011

Subject: ASME B107.300-2010; para. 6.3(e); Accuracy Test Operation

Our understanding of the question in your inquiry and our reply is as follows:

Question: Does B107.300 require a certain number of break points or detents within the clutch?

Reply: No. Testing is based on percentage of capacity and does not depend on the number of breakpoints on the tool.
