Working Group Valves in attendance:

Professional Development Hours (PDH) are made available to the following members of the BPV III:

Design, fabrication, examination, testing, and inspection.

Interpretations, Code Cases, and Appendices applicable to Valves. Construction: As used in this chapter, includes materials applicable to Valves (including Pressure Vessel Codes) for use in nuclear power plants and other nuclear facilities. This applies to construction rules for publication in the ASME Section III. Based on Pressure Vessel Code. These construction rules are applicable to Valves.

Scope of Technical Course: The WTC Valves has the responsibility to develop, review, coordinate, approve, and maintain.
