General Scope of the Task Group

1. Recommendations to Construction Codes concerning a model program for implementation.
   a. The Task Group should consider the duties of the AI; consider Table 7-A.1 in Section VIII, Division 2 as a starting point.
2. Each project team will focus on specific points in their scope and develop the requirements necessary for the implementation of the duties.
3. All entities that are involved in the fulfillment of the duties need to be addressed in the requirements.
4. Each project team will
   a. Ensure all requirements are addressed, beyond those listed in these scope statements
   b. Address where the requirements are to be located
   c. Address the interaction / relationship to other Sections of the Code

Project Team Scopes

Project Team Hardware / Software / Data

- Hardware
  - Calibration
  - Accuracy
  - Connectivity
- Software
- Data Storage
- Data Accuracy
- Data Security

Project Team Personnel

- In field device controller
- Authorized Inspector
- Certified Individual
- Continuing Education
- Management
- Training
- Personnel Qualifications

Project Team Quality Assurance

- QA Manual Requirements
- QAI-1
- NQA
- Record Retention
- Auditing
Project Team Process

- In-Process Inspection
- Final Inspection
- Procedure Qualification
- Procedure Demonstration
- Lighting Requirements

Project Team Management / Administration

- C&S Policies & Procedures

Project Team BPV VIII Model Program

- Program for Division 2
