Approval Date: April 16, 2020 TBD

Code Cases will remain available for use until annulled by the applicable Standards Committee.

Case 2996
Extension of Joining Personnel’s Qualification Continuity
Section I; Section III; Section IV; Section VIII, Division 1;
Section VIII, Division 2; Section VIII, Division 3; Section IX;
Section XI, Section XII, B31

Inquiry: Under what conditions may an organization extend the qualification continuity of joining personnel?

Reply: It is the opinion of the Committee that the qualification continuity of joining personnel who have experienced an employment interruption due to the COVID-19 outbreak may be extended beyond that allowed by QW-322, QB-322, and QF-322 an additional three months under the following conditions:

a. The qualification was valid at the time of the employment interruption and
b. The qualification was scheduled to expire during the employment interruption.

The latest date the joining personnel uses the process within the extended period will be the new date for continuity purposes. QW-322.1(b), QB-322(b), and QF-322.1(b) shall still apply for the joining personnel whose continuity has been extended. The provisions of this Code Case will expire three months after the approval date.

This Case number shall be shown in the joining personnel’s continuity report.

The Committee’s function is to establish rules of safety, relating only to pressure integrity, governing the construction of boilers, pressure vessels, transport tanks and nuclear components, and in-service inspection for pressure integrity of nuclear components and transport tanks, and to interpret these rules when questions arise regarding their intent. This Code does not address other safety issues relating to the construction of boilers, pressure vessels, transport tanks and nuclear components, and the in-service inspection of nuclear components and transport tanks. The user of the Code should refer to other pertinent codes, standards, laws, regulations or other relevant documents.
